What's on the PE Civil Breadth Exam?

The PE Civil Breadth exam covers a wide range of topics in civil engineering, including:

- Project planning and management
- Geotechnical engineering

- Structural engineering
- Water resources engineering
- Environmental engineering

The exam is divided into two parts. Part A covers project planning and management, geotechnical engineering, and structural engineering. Part B covers water resources engineering and environmental engineering.

How to Prepare for the PE Civil Breadth Exam

The best way to prepare for the PE Civil Breadth exam is to use a study guide. A good study guide will help you understand the exam topics, practice your skills, and identify your weaknesses. There are many different study guides available, so it's important to find one that fits your learning style. Some popular study guides include:

- PE Civil Breadth Exam Study Guide by PPI
- PE Civil Breadth Exam Study Guide by Kaplan
- PE Civil Breadth Exam Study Guide by School of PE

Once you have a study guide, you should start studying for the exam at least six months in advance. This will give you plenty of time to cover all of the material and practice your skills. It's important to be consistent with your studying and to set aside time each day to study. Don't try to cram everything in at the last minute.

In addition to using a study guide, you should also practice taking practice exams. This will help you get used to the format of the exam and identify

areas where you need more practice. There are many different practice exams available, so you can find one that is similar to the actual exam.

What to Expect on Test Day

On test day, you should arrive at the testing center early and be prepared to show your ID. You will be given a locker to store your belongings and then you will be escorted to your testing station. The exam is four hours long and you will be given a break halfway through. You are allowed to bring a calculator and a pencil to the exam.

The exam is computer-based and you will be given a virtual whiteboard to use for your calculations. You will be able to flag questions for later review and you can skip questions and come back to them later. You will also be able to see how much time you have left at any time.

Scoring the PE Civil Breadth Exam

The PE Civil Breadth exam is scored on a scale of 0 to 100. A score of 70 or higher is considered passing. The exam is graded by a computer and you will receive your results within a few weeks of taking the exam.

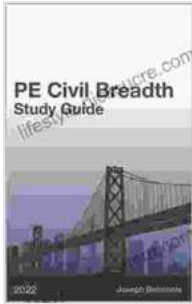

The PE Civil Breadth exam is a challenging exam, but it's also one of the most important exams you can take as a civil engineer. If you're planning to take the exam, you need to start preparing early and use the best study guide available. This guide will help you understand the exam topics, practice your skills, and pass the exam on your first try.
